

Dyota EAS AM Deactivator

Dyota EAS deactivator, also known as a decoder degaussing device, is specially used for decoder degaussing of EAS soft label tags so that the products would not trigger the alarming function. Dyota EAS AM deactivator is installed on the cashier desk; each cashier desk is equipped with one EAS deactivator. When customers settle accounts for commodities at the cash register, the cashier will put the commodity attached with the AM soft label right over the EAS AM deactivator and degauss AM soft tag quickly. An audible beep will indicate when the label has been permanently deactivated.

MODEL NO. HR906

This AM deactivator has stable performance and a high degree of deactivation, high compatibility, quality appearance, and easy operation. The deactivator comes with a detachable ring enabling both desktop and flush mount installation. The deactivator quickly and permanently deactivates any 58 KHz acusto-frequency (AM) security label at the point-of-sale (POS).

SPECIFICATIONS

Parameters	Value
Frequency	58KHz
Deactivating Height	8-12cm
Device Built Size	22*20cm
Color Dark	Grey
Material	ABS Plastic
Power Supply	Included
Packing Details	1pc/box, box size 27x26x15cm, 2.26 Kg/box

ELECTRICAL

Parameters	Value
Input Voltage	18 Vdc, 1.7A
Input Voltage PSU	100-240 Vac, 50/60 Hz
AC Line Current	1 Arms (max)
Output Voltage	18 Vdc

PRODUCT HIGHLIGHTS

- Manufactured with high-quality ABS Plastic Material.
- Advanced technology ensures the stable performance of the deactivator.
- Easy installation and operation.
- Best for Supermarkets, Garment shop, Digital shop, Pharmacy, etc.
